EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

On page 2 of the specification in the section entitled "Cross-Reference to Related Applications", the phrase "This application is a continuation-in-part of U.S. Patent Application Serial no. 10/420,995, filed April 21, 2003 and is also a continuation-in-part of U.S. Application Serial no. 10/286,648, filed November 1, 2002, now U.S. Patent no. 6,743,635, issued on June 1, 2004, which" was deleted and changed to the following:

-- This application is a divisional of U.S. Application Serial no. 10/286,648, filed November 1, 2002, now U.S. Patent no. 6,743,635, issued on June 1, 2004, which--
since the instant application was originally designated in the specification as being a divisional of application serial no. 10/286,648.

2. The following is an examiner's statement of reasons for allowance: Application serial no. 10/706,161 is being allowed since none of the prior art of record teaches or fairly suggests a method wherein a meter enters into an active mode from a sleep mode by detecting a current flow through an auto-on conductor located on either a test strip or a check strip inserted into the meter, followed by a step of determining if a measured voltage drop across the auto-on conductor is indicative of a test strip or a check strip based upon a comparison between the voltage drop and a predetermined value.

Art Unit: 1743

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
